

Valley University, Salt Lake Community College, Utah College of Applied Technology, and any other university or college which may be established and maintained by the state.

- 5.18 Appendices
- A. Data Points List – Section 5.11
  - B. Energy Modeling Spreadsheet – Section 5.5
  - C. Life Cycle Cost Worksheet – Section 5.5
  - D. HPBS Sustainability Worksheet – Section 5.6, 5.7, 5.8, 5.
  - E. HPBS Workshop Suggested Agenda – Section 5.1
  - F. OPR Required Sections – Section 5.15
  - G. Envelope Commissioning Matrix – Section 5.13
  - H. Incentives and Rebates Process Guidelines – Section 5.14
  - I. Incentives and Rebates Responsibility Matrix – Section 5.14

**End Notes:**

- 1) Definition of Student Housing – a student housing building consists of a multi-unit housing building designated for housing students on or near an institute of higher education. If a housing building is combined with a building of another use, such as academic or research space, then this addendum to the HPBS does not apply and that project should follow the full HPBS. If a combined use building is 20% or less of other uses (or 80% or more student housing space) then it will be considered a student housing building and this addendum will apply. A typical student housing unit will include multiple kitchens, and possibly a café or cafeteria.
- 2) Definition of an original OPR/BOD – an original OPR/BOD is written specifically for one building project and includes the wants and needs of the owner/ operators of the building as understood through the programming phase of the project.

Definition of a standard OPR/BOD – this standard OPR/BOD is a reference to the student housing committees OPR/BOD document that outlines all of the typical requirements of a student housing building. This recognizes that student housing buildings have typical features that can be documented once by the committee and therefore save time and cost for every student housing project that is built in Utah. The standard OPR/BOD will be written by the committee following the process outlined in the HPBS and has inter-changeable sections accounting for various kitchen and café/cafeteria options that can be plugged into a project as needed.
